

Sexual Health Education Services

with a focus on South Asian LGBTQ+ communities

Overview

This program's key focus is to help gay, bi, and queer men from South Asian and related communities to ensure they can access services and resources needed for their wellbeing.

This is done through ongoing training and education in sexual health, one on one support, and outreach at spaces frequented by our community members.

Funder

Ontario Ministry of Health

For

gay, bi, and queer men from South Asia and related communities.
